

Colorectal Cancer Screening

HELP YOUR EMPLOYEES FIND, TREAT, AND POTENTIALLY SURVIVE COLON CANCER.

Colon cancer is the 2nd leading cause of cancer-related death.

When caught in early stages, colon cancer is more treatable in about 90% of people.

About 75% of people with colon cancer have no family history.

Signs and symptoms often do not appear in early stages, so it is important to screen as soon as you're due.

Cologuard is one type of colorectal cancer screening test designed to detect early changes or existing cancer. You may wish to discuss with your doctor which type of test may be appropriate for you.

Schedule today at OneTGH@tgh.org or (855) 844-8743.

COMBAT THE 2ND LEADING CAUSE OF CANCER!

Colorectal Cancer Screening

OneTGH Employer Solutions Colorectal Cancer Screening offers in-home Cologuard screening tests to help your employees get screened regularly.

- 1** Your employees will register and order a kit via a OneTGH registration link, based on their eligibility. Employees must meet the 45+ age threshold and not have had a Cologuard within the last 3 years.
- 2** Our Registered Nurses will assist your workforce in identifying risks for colon cancer.
- 3** Once the employee completes the test and the Lab processes it, the results will be online on the TGH MyChart (online patient chart).
- 4** Abnormal results are referred to diagnostic testing to confirm the absence or presence of colorectal cancer.

Colonoscopy after a positive test to be covered by insurance without cost sharing. For most patients this took affect on January 1, 2023 and does not apply to commercial plans with exempt status.

Schedule today at OneTGH@tgh.org or (855) 844-8743.
