Rainbow Art!

First, spread out some foamy shaving cream on a flat surface or in a tray or pan. Smooth it out a bit.

Then use either food coloring or liquid watercolors and put blobs of color with a paint brush or eye dropper. Liquid watercolors

give the most vibrant colors. You can make the colors in a rainbow order: red, orange, yellow, green, blue, & violet.

Next, swirl/marble the colors with a stick. You can use a kabob stick, toothpick, popsicle stick, or even a stick from your yard.

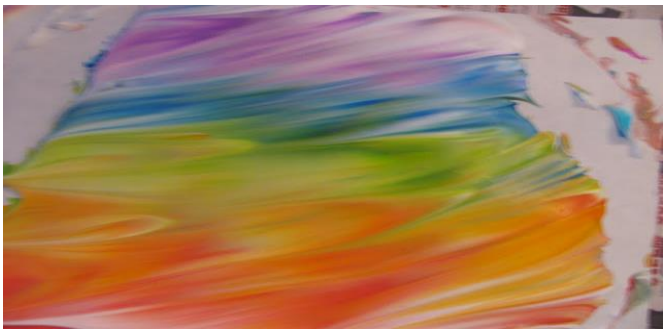

Next, put a piece of paper on top of the swirled colors and press down and smooth your hands over the paper.

Lift the paper.

Then use a flat edge to scrape the shaving cream off the paper. You can use a piece of cardboard or anything with a straight edge.

Scraping off the shaving cream reveals beautiful rainbow marbled paper!

You can purchase liquid watercolors at a craft store or on Amazon.
