How to Make Mini Marshmallow Poppers

Watch the science video to see it in action!

David used a sling shot and 5 smooth rocks to fight Goliath.

Make a mini marshmallow popper and practice your aim!

Items you'll need:

*Plastic cups

*balloons

*mini marshmallow (or pom poms)

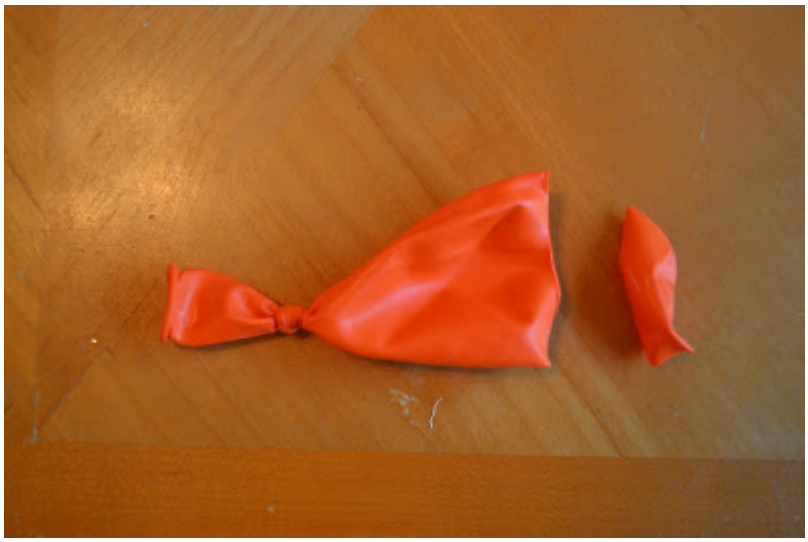

*scissors

Directions:

1. Cut the bottom part off of your plastic cup. You can double up the cups and cut off the bottom third.

2. Tie a knot at the end of your balloon and cut off about ½” from the other end.

3. Now stretch the balloon over the end of the cup. (Tip: Put the balloon on the top part of the cup where the lip is, otherwise, the cup may bend too much.

4. Put your marshmallow inside the cup on the knotted center, then aim the cup away from you, pull back on the outer knot and launch away!
