February 25, 2018

Dear Laguna Road Family,

This is an important update from the Laguna Road SOS Foundation. For the last two years, the SOS Foundation has funded the Laguna Road STEM and Innovation Program, now known as Project Impact. Through your support and our fundraising efforts, we have successfully launched an original program that is educating our children in the areas of science, technology, engineering, math, and innovation with a targeted focus on how our children can impact the world around them!

We are very proud of this effort and want to keep you informed of how the foundation is currently working on renovating the current Media Center at Laguna Road. Plans for the renovation have been completed and approved by the Fullerton School District.

Currently, SOS is partnering with an architect to complete the bid package. The renovated space will include room for STEM and Innovation, library, and flexible seating for a mobile tech lab.

If all goes according to schedule, construction is anticipated to begin as early as May, with completion in August for the 18-19 school year!

Thank you for your support! It truly is not possible without each of you!

With gratitude,

The SOS Foundation Board
