

## *11<sup>th</sup> Intercontinental Landfill Research Symposium (ICLRS 2022)*

### **Call for Session Proposals**

*September 2022  
East Coast, USA\**

#### **Symposium Objectives and Format**

The ICLRS serves as the premier international meeting for an exchange of ideas among landfill researchers throughout the world. In contrast to other meetings, the focus of this meeting is on leading edge research covering all aspects of landfills. The objectives of the symposium are to (1) assemble world's leading researchers and practitioners in the solid waste field, (2) address a broad range of topics related to landfills, and (3) discuss and debate current knowledge and future directions. The emphasis of the ICLRS is on critical discussion and detailed exploration of a topic. To this end, sessions are typically 2-3 hours and include 4 to 5 presentations. Each session is designed so that at least 50% of the time is spent on discussion.

#### **Request for Session Proposals**

Session proposers should provide a paragraph on the topic background and list session objectives, subjects to be addressed, and potential presenters. Session proposals will be submitted through an online platform ([link](#)) by the deadline below. Once selected session organizers will then actively solicit presenters and instruct them to submit abstracts by the deadline below. Session organizers will also be able to include presenters who have independently submitted abstracts.

Sessions from past ICLRS events have included the following:

- Landfill mining
- Landfill covers – materials and design
- Landfill aeration
- Even gas distribution in methane oxidation systems
- Anaerobic decomposition of forest products in landfills
- Methane oxidation systems
- Modeling landfill gas
- The use of stable isotopes for quantification of methane oxidation in landfill
- Disaster waste
- The fate of emerging compounds in landfills
- Landfill aftercare completion
- Landfill stabilization and sustainable landfill

#### **Key Dates:**

Session Proposal Submittal Deadline: February 25, 2022

Abstract Deadline: Summer 2022

**Organizers:** Environmental Research & Education Foundation (EREF), Tarek Abichou (Florida State University), Morton Barlaz (North Carolina State University), Nicole Berge (University of South Carolina), Anders Lagerkvist, (Luleå University of Technology) and Debra Reinhart (University of Central Florida).

\*Exact date & location will be announced in early 2022
