Highlights of 4th CDOIQ European Symposium

A Big Thanks to Our Valued Partners

Save The Date September 10th, 2026

Symposium Highlights | Premier Platform for Data and AI Leadership

The European Chief Data Officer & Information Quality (CDOIQ) Symposium was an undeniable success! On September 11, 2025, we have welcomed over 235 CDOs, CAIOs and senior data/AI leaders from more than from more than 170+ companies, 15 industries and 15+ countries.

This year's theme, "From Data & AI Experimentation to Tangible Impact," drove powerful discussions. Through keynotes and panels, experts explored how to make organizations data & AI-ready, evolve data strategies, and drive innovation using Gen(AI) and AI Agents. We also covered essential topics like successful data collaboration and data monetization.

Don't miss reading the event highlights, along with quotes from several CDOs sharing their experiences, in an article published by our media partner, [CDO Magazine](#).

Plus, take a look at impressions from the symposium and the reception at the Olympic Museum in our [photo gallery!](#)

Our Valued Partners | A Big Thank You

We express our sincerest gratitude to our Platinum Sponsors (Collibra, Google Cloud, Deloitte) and Gold Sponsors (Informatica, Orange Business, OneData, Denodo, Thoughtworks, Neudata, Snowflake), as well as our generous hosts, the University of Lausanne and CC CDQ. Your invaluable support has been instrumental. Thank you from the CDOIQ European Organizing Team and all participants!

Save The Date | Mark Your Calendar - September 10th, 2026!

The next European CDOIQ Symposium is scheduled for Thursday, September 10, 2026, in Lausanne. Following the success of our past events, we are maintaining the proven format of this exclusive, invitation-only symposium for European data and AI leaders, co-chaired again by Dr. Wang and Dr. Legner.

Stay tuned for more updates on our dedicated [CDOIQ Europe LinkedIn page](#).

Snowflake | Your All-in-One Platform for Data & AI

Snowflake is the single, fully-managed platform for all your data and AI needs. It offers effortless onboarding, low-maintenance operations, and easy-to-optimize savings. With built-in security features, Snowflake reduces the risk of vulnerabilities and breaches, while its interoperability allows for lightning-fast data sharing across clouds. For AI and machine learning, Snowflake provides strong native support. Snowflake Cortex gives you access to large language models (LLMs) and other AI functions. Plus, Snowpark ML lets you build, train, and deploy custom ML models using Python, all while keeping your data secure and integrated.
