Evidence-Based Practice Fellowship Program

An advanced initiative within the UCSF Leadership Institute, the Evidence-Based Practice (EBP) Fellowship Program is a ten-month initiative for frontline care providers interested in improving their EBP knowledge, skills and abilities. This program will engage participants in an innovative and educational experience focused on facilitating an evidence-based approach to implementing a formal practice change, in addition to assessing the outcomes and impact of the interventions in a clinical setting. It provides a great pathway for professional growth and development and lifelong learning.

This program includes participation in 55 hours of graduate-level EBP didactic education. Participants will be guided through development, implementation, evaluation and dissemination of a formal practice change at the microsystem level, in addition to receiving support from expert facilitators and trained mentors using the evidence-based practice process. The program will leverage concepts of decision-making, implementation science and evaluation of change.

Outcomes for the EBP Fellowship Program include:

- Participants will develop a deep understanding of the seven steps of the EBP process and apply this knowledge to implementing a practice change.
- Participants will engage in implementation science strategies and utilize a multi-modal sustainability plan to increase improvement efforts.
- Participants will become EBP Champions for their unit and organization to foster and sustain a positive EBP culture.

Continuing education provider approved by the California Board of Registered Nursing, Provider Number 12980 for 55 contact hours.

Program Timeline
