A Message from the Manager

Brothers and Sisters,

I just wanted to reach out to assure you we are doing everything we can to protect our members during this government imposed shut down.

Our team has been through 9-11, the 2008 economic crash and Hurricane Sandy. We are a veteran crew when it comes to adapting to catastrophe.

Our financial house is solid, our funds remain healthy and are positioned in risk averse investments.

Our J.A.T.C. is exploring every avenue to continue training with minimal disruption.

We are monitoring and are deeply engaged with our local, state and federal governments.

We are on top of issues on projects and preventing similar occurrences from manifesting in the future.

We are working with our employers closely and will develop a strategy for future pandemic.

We are working diligently to assure our members get medical treatment, medicines they need and make sure pension payments continue.

We ask that everyone try to remain calm and help each other as much as possible.

Please remain flexible on your projects to help mitigate viral spread.

We will get through this together as a family.

Patrick Delle Cava
Business Manager
