

The 2024 Future of Healthcare Founder Residency is a collaboration between MaineHealth, Northern Light Health, Maine Venture Fund, and The Roux Institute. This program aims to accelerate the development of innovative early-stage startups to collaboratively design solutions for our patients and communities. As the executive sponsor, thanks again to the core group of people that co-created the program and investment component – Susan Ahern, Lou Inzana, MBA, CPA, Al Swallow, Tom Marczak, Susan Keiler, Doug Sawyer, MD, PhD, Andrea Patstone, Dan Nigrin, MD, Brady Bohrmann, and Nir Harish, MD with the support of MaineHealth CEO, Andy Mueller, MD.

MaineHealth Innovation extends its heartfelt thanks to the 25+ MaineHealth care team members who are generously sharing their time, knowledge, and expertise with the founders. The MaineHealth support is instrumental in guiding these innovators through the complex healthcare landscape, including exploring methods of integrating healthcare technologies into clinical settings, identifying best practices for effective clinical adoption, understanding the intricacies of Epic integrations, and defining ROI for quality care.

The dedication and community partnership are significantly impacting the health tech ecosystem in Maine. As one founder noted, “I can feel how deeply MaineHealth is living its vision.”

A Special Thanks to These Outstanding Care Team Members!
