

# UPDATE: COVID-19 Lab Results from CVS Minute Clinic in CurrentCare Viewer

As of 4/6/20, CVS Health opened a [drive-through coronavirus test site \[r20.rs6.net\]](https://r20.rs6.net) in Rhode Island, and the results of those tests are available in CurrentCare Viewer, for patients who are enrolled in CurrentCare.

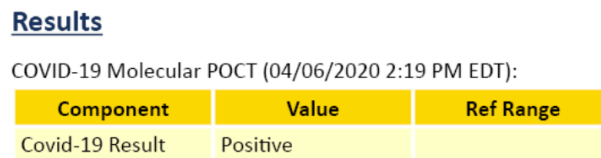

Within the Viewer, Providers can see this information from "CVS Health & Minute Clinic" in 2 places:

- **Encounters** tab - the **Reason for Visit** sometimes includes the results:

A screenshot of the 'Reason for Visit' field in the CurrentCare Viewer. The field is highlighted in yellow and contains the text: 'Cough; Fever, unspecified fever cause; 2019 coronavirus detected'.

- **Clinical Documents** tab - open "Medical Record Summary" & go to the **Results** Section:

A screenshot of the 'Results' section in the CurrentCare Viewer. It shows the title 'Results' and the test name 'COVID-19 Molecular POCT (04/06/2020 2:19 PM EDT):'. Below this is a table with three columns: 'Component', 'Value', and 'Ref Range'. The table contains one row with the following data:

Component	Value	Ref Range
Covid-19 Result	Positive	

Note: At this time, the CVS results will not display on the **Lab Results** tab.

Don't forget that we have the 'Forgot username?' and 'Forgot password?' options on the CurrentCare Viewer login page. Please reach out to [CurrentCare@riqi.org](mailto:CurrentCare@riqi.org) or **888.858.4815** if you have questions.
