## **Learning Objectives:**

*After completing this webinar, participants will be able to:*

1. Describe the role of music in aging, specifically pertaining to memory.
2. Recognize the difference between neurologic music therapy and music making, and to when each would be applicable in treatment.
3. Discuss the impact of neurologic music therapy on patient and caregiver health outcomes in targeted populations.
4. Analyze the role of music in supporting aging and continuity of care and how it can be applied to practice.

## **CONTINUING EDUCATION**

This activity has been submitted for 1.0 contact hour of nursing and social work continuing education.
