Optimizing ADHD Care in Pediatric Care: Expanding Capacity for Complex and Comorbid Cases

With generous funding from **United Healthcare**, CTC-RI is pleased to announce a **training opportunity to improve pediatric assessment and response to pediatric ADHD and its complex comorbidities.**

Selected practices will participate in a 12-month ECHO® with a choice of two tracks:

Track 1 (\$7,500 stipend): Comprehensive practice change (ECHO® participation + case study presentation + practice facilitation + quality improvement project).

Track 2 (\$3,000 stipend): Foundational learning (ECHO® participation + case study presentation only).
