Re: Production of Hand Sanitizer by B.C. Craft and Commercial Distilleries

LDB Requirements

- All alcohol used in the production of hand sanitizer by any distillery must be fully accounted for. If requested, records should clearly indicate the volume of alcohol used for the production of hand sanitizer.
- Craft distilleries can procure Neutral Grain Spirit (NGS) strictly for the production of hand sanitizer. NGS may not be used to produce any alcohol beverage products.
- The production of hand sanitizer at a licensed location is only permitted for the time period prescribed by the Liquor and Cannabis Regulation (LCRB). For craft distilleries acquiring NGS, you must immediately dispose of any leftover NGS once this time period has ended.
- Craft distilleries that plan to produce hand sanitizer must notify LDB via email at regemail@bcldb.com.

If you have questions about LDB's requirements, please contact LDB Finance Wholesale, Regulatory and Compliance at regemail@bcldb.com.

Sincerely,

Michael Bhala
