

# Chronic Wasting Disease Management ACT (S. 2252)

**Date of Introduction:** December 19, 2017

**Lead Sponsor:** Senator John Tester (D-MT)

**Original Cosponsors:** N/A

**Committee of Jurisdiction:** Senate Agriculture, Nutrition, and Forestry

## BACKGROUND :

Chronic Wasting Disease (CWD) is a specific disease affecting only cervids such as deer, elk, and moose. A slow and progressive disease with a lengthy incubation period, infected deer, elk, and moose may not present visible symptoms of the disease until years after the time of infection. At this time there is no way to conclusively identify the presence of CWD within an animal until a necropsy has been performed.

The lack of definitive information regarding CWD, and its potential to impact large portions of North America's cervid populations, establishes a critical need for additional resources to be made available to the state and tribal agencies dealing with the disease. As it currently stands, state fish and wildlife agencies are forced to divert funding from various other conservation projects in order to address the threat of CWD. As a result, surveillance and research efforts related to CWD are underfunded, and come at the expense of other conservation efforts.

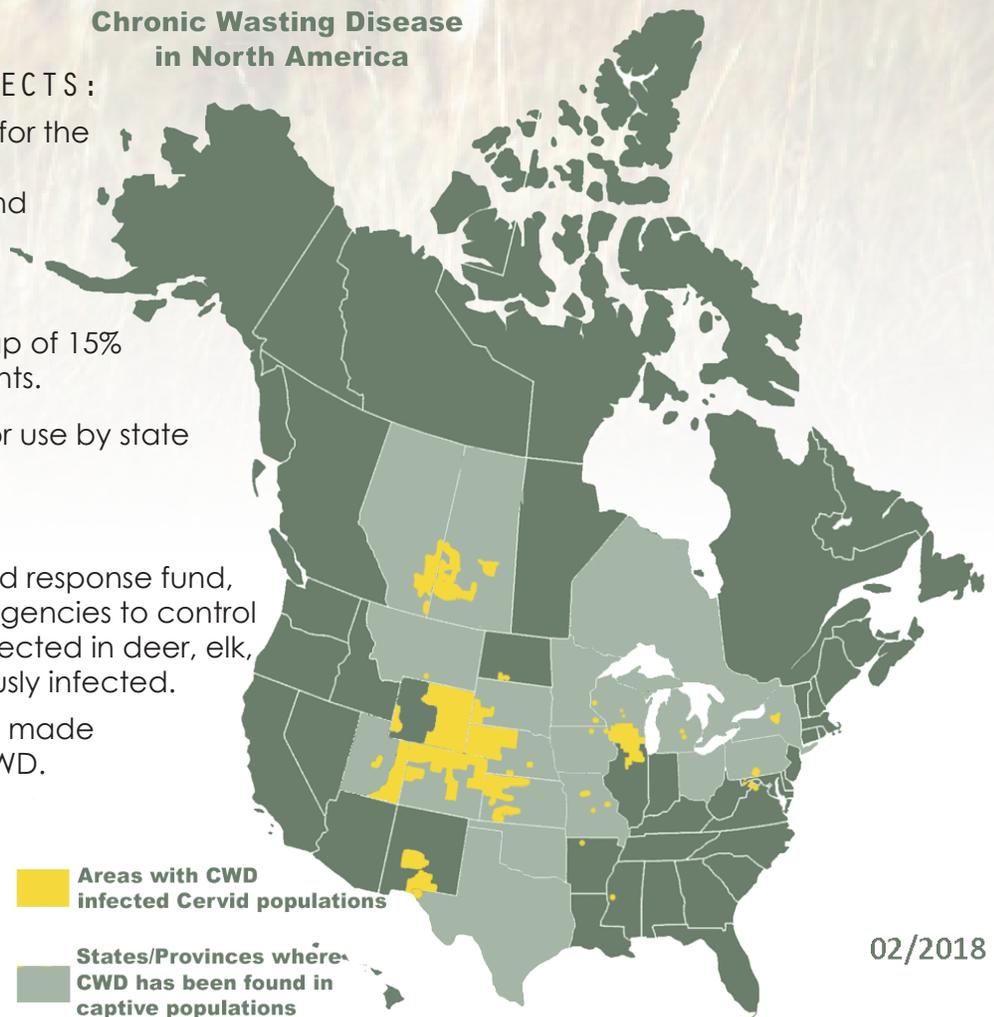

## Chronic Wasting Disease in North America

### LEGISLATIVE GOALS AND EFFECTS:

**\$35 MILLION** will be appropriated for the Secretary of Agriculture to support state and tribal efforts to manage and control the spread of CWD. An administrative cap of 3% is applied to the Secretary of Agriculture in administering these grants, and a cap of 15% is applied to all eligible grant recipients.

- **\$20 MILLION** is to be set aside for use by state fish and wildlife agencies.
- **\$5 MILLION** for tribal agencies.
- **\$10 MILLION** allocated to a rapid response fund, which will go to state and tribal agencies to control the spread of CWD when it is detected in deer, elk, or moose populations not previously infected.

An additional **\$25 MILLION** will be made available for applied research on CWD.
