## Prepare Email HTML

- 1. Open index-mailchimp.html with a text editor (Notepad). Do not use a program like word for this.
- 2. Update the areas that are contained within square brackets. You can find these by searching for the "[" character. Here is a list of spots that must be updated.
  - Header [FACEBOOK LINK HERE]
  - Header [TWITTER LINK HERE]
  - Header [INSTAGRAM LINK HERE]
  - Quote Text
  - Quote Name and Occupation
  - o [insert name of your college]
  - [insert your organization's name]
  - Website URL [insert URL]
  - Read more URL [insert URL]
  - Infographic URL [insert URL]
  - Learning Mode Text
  - Learning Mode URL [insert URL]
  - o Footer [FACEBOOK LINK HERE]
  - o Footer [TWITTER LINK HERE]
  - o Footer [INSTAGRAM LINK HERE]
  - Footer [PRIVACY LINK]
  - Footer [TERMS LINK]
  - Footer [ACCESSIBILITY LINK]
- 3. Open the file in a browser to check that all links/content is working properly.

## Import File to MailChimp

- 1. Log in to Mailchimp
- 2. Click Create Campaign in the upper right corner
- 3. Select Email from the list
- 4. Select Regular and give the campaign a name. Then click Begin.
- 5. Click Design Email on the right
- 6. Click "Code your own" at the top of the page
- 7. Click "Paste in code"
- 8. Copy the html from the file you prepared above and paste it into the editor.
- 9. You can now update your subject line and preview/test the email as you would normally.
