Monitor, Track, and Automate

Book a Discovery Call

With a fully automated, error-free workflow, technicians can focus on the job at hand and leave the asset tracking to Kahi. This frees you and your team up to work more efficiently and deliver a better customer experience.

Automated Field Data Collection: Kahi generates meaningful data and comprehensive reports without requiring technician input. Stay informed with up-to-date information, maximize equipment usage, and enhance workflow automation effortlessly.

Advanced Reporting Capabilities: Conduct audits and generate discretionary reports with accurate, comprehensive, and historical data. Kahi ensures you have the information you need to make informed decisions and maintain optimal operations.

Seamless Integrations: Designed to integrate smoothly with other systems, Kahi facilitates the sharing of collected data with various consumers, including Job Management, Accounting, and vendor-specific integrations—ensuring a cohesively efficient operational ecosystem.

Fixed Warehouse Gateway

- Creates “home base” for your equipment
- Works on cell service (SIM/data incl.)
- Plug and play

Tracking Beacons

- Installed on your equipment
- Communicates with all our gateways
- Battery life minimum 2 years
