Landscaping for the Future

A Professional Guide for Architects in Ecological Landscape Design

Agatha Martello

This course introduces architects to the foundational and advanced principles of ecological landscaping. Moving beyond aesthetics, it explores the deep interconnection between design, ecology, and environmental responsibility. With a growing demand for sustainable solutions, architects are uniquely positioned to drive meaningful changes by integrating regenerative design into their built environments. This class provides a succinct overview of the ecological literacy and practical tools needed to transform outdoor spaces into thriving, low-impact, resilient landscapes.

More Than Gardens Inc., founded in 2018, is a pioneering landscaping company that provides ORGANIC,

REGENERATIVE and ZERO-EMISSION services on Long Island, NY.

Founded by Agatha Martello, our small woman-owned and operated business is more than just a landscaping service – it's a commitment to sustainability, beauty, and environmental stewardship.

Born in naturally beautiful Brazil, Agatha's passion for the environment led her to a career in conservation biology, specializing in ecology of landscapes.

More Than Gardens is her regenerative dream in action, planting gardens that contribute to a greener future. At More Than Gardens Inc., we specialize in crafting landscapes that bridge the gap between your dream garden and our planet's urgent needs. Our mission is twofold: to help you achieve the garden you've always envisioned while simultaneously addressing critical environmental challenges. Through sustainable, organic, regenerative, and zero emission

practices, we're reshaping the way landscaping contributes to our world
