What is the best piece of advice you have ever received? The best piece of advice I've ever received is "if it can be fixed or replaced with money it simply isn't that important".

What qualities do you look for in a leader? I like leaders with a servants heart. Willing to build others up by investing in those around them rather than focusing on what they "as the leader" will gain from their teams efforts.

If you had to delete all but 3 apps from your smartphone, which ones do you keep? The Bible app, Family Album app, the texting app.

Favorite thing about Enid? The "mostly" friendly people.
