

We want technology to simplify things...
But it's not so simple!

AGC Florida East Coast Chapter

The Associated General Contractors of America

Quality People. Quality Projects.

THE AGC FEC TECHNOLOGY COMMITTEE

IS HERE TO HELP!

In this ever-changing technology landscape, AGC is committed to providing its Members with access to the knowledge and skills needed to implement the technologies that are changing our industry. As technology continues to evolve, the AGC Construction Technology Committee is convening to work to expand the knowledge base of our Members with respect to the use and benefits of technology in the Construction industry.

GOALS

- Educate Member Firms on the utilization of current technologies and industry best practices.
- Develop a strong understanding of current and next generation technologies and facilitate opportunities to learn about these technologies.
- Increase awareness of current technology and future trends.
- Create a forum for the discussion of ideas, best practices and strategies for technology deployment
- Interface with other AGC Committees and industry groups to improve adoption of technology within each discipline.
- Grow the Use of Technology by Member Firms.

WHO SHOULD PARTICIPATE?

This committee is open to all member firms and meetings will be held Virtually! Meetings are not just for IT professions. Anyone interested in learning how Construction Technology is impacting our industry, from digital collaboration and back-office implementations, to on-site execution should attend.

TOPICS TO INCLUDE:

- Digital Design & Construction
- LEAN / BIM/ VDC
- Document & Contract Management Tools
- Field Productivity Applications
- Data and Analysis
- Virtual Reality
- Drones, AI, Robotics.
