THE DENTURIST SOCIETY OF SASKATCHEWAN 2022 NATIONAL CONVENTION

Dear Invitees,

Celebrate our 45th Anniversary with us! We are excited to invite you to join us for this National Event. Along with our fantastic sponsors and vendors who have stepped up to ensure this event's success in bringing you some valuable continuing education, we hope to see you there!

COVID-19 Precautions Expectation Policy

Please note that we understand the below may seem overly cautious but we are taking into account the current environment and the regulations for healthcare providers. Thank you for your understanding.

1. Use hand sanitizer on a regular basis during the events.
2. Maintain social distancing, where possible, at all times.
3. Masking during this event is strongly suggested with the exception of meal times (while eating).

Please feel free to reach out to the DSS office by email admin@saskdenturists.com or phone 1-855-633-6875 ext. 5 with any questions you may have.

We look forward to seeing you all in Saskatoon!

SPONSORS

The Denturist Society of Saskatchewan truly appreciates our sponsors and exhibitors. As we all moved through these unprecedented times over the past 2 years, we remember that as busy as we all are, that the teams we rely on at our supplier and vendor level are busy ensuring that we have everything we need to provide denture care to patients.

We wanted to take a moment to acknowledge and say thank you for all you do and for your continued support of the profession, we would not be able to do all that we do without your support!

Swiss NF Metals: Removable Implant Dentures 101: A Practical Real-World Approach HANDS-ON Workshop (max 12 participants) Mark Chan DD 3 CE Credits

REGISTRATION REQUIRED

Overview: This workshop and session will focus on the fundamentals of removable implant overdentures with all required clinical and technical components required to complete a case from start to finish as a dentist.

Course at a Glance:

- Maintaining a team approach, what to do before the implants are placed for prosthetic success
- Implant identification: what you need to order the right parts
- Connections: what are the common implant connections that denturists encounter in clinical practice
- Abutments: what are the types, what are the indications and contraindications, what tools are required to service such abutments
- Abutment height selection according to gingiva height and abutment type
- Torquing abutments, and tools required
- Impression taking basics, bite registration, processing methods, mesh retention design
- Intraoral pickup of attachments, what is required and what to look out for
- Maintenance: O-Rings, Retentions inserts, and retention levels what are they
- Servicing removable implant overdenture prosthetics, relines, rebases
- Recall and patient education
- What to do when things go wrong what to look out for
- Overview of Digital implant overdentures, and best practice

About the Speaker: Mark Samuel Chan received his diploma from Denturism in Toronto at George Brown College with honours. Currently Mark is practicing in Ontario with a main focus on high-end removable and implant prosthetics. With a passion for both technical and clinical techniques he is certified in Bio-logic, BPS and SDC denture concepts and is a ZunstZhanWerk “Art of Denture”; award winning Denturist, he is a sought-after consultant and opinion leader in the Denturist and Lab community.

PLEASE NOTE:

- *This is the same course offered twice, please only register once as there is limited space.*
- *Maximum of 12 participants per session*
- *Only available to DSS members*
- *This is not for The DAC AGM attendees as the meeting will be during this course*

TRADESHOW & Kick-Off

1 CE Credit

Don't miss this opportunity to meet and network with exhibitors!

Join your DSS Council, fellow denturists and vendors for a Conference Welcome and a few of the event's 'Need to Knows' to open the conference with a bang! This will be a good opportunity to say hi to fellow denturists and the amazing vendors, whom you likely haven't had a chance to spend time with lately!

12:30 pm to 1:00 pm
William Pascoe

LUNCH & Learn – Demo 1 - SteriScan™ System - SIMPLE, Compact and Compliant!

Frank & Lorraine Pedersen

1 CE Credit

Overview: The SteriScan™ system is completely electronic. It is hardwired to the office network and to each sterilizer so it creates efficiencies right from the moment it is installed. It requires very little training and takes up no counter space. There are NO Monthly fees, no user fees, no adapters to purchase, no barcodes to make, no extra piece of equipment is required to run this system.

With all the changes to record keeping from the Sterilizers, learn how the SteriScan™ system will make your record keeping a breeze. We will offer a complete demonstration of the SteriScan™ system over lunch. Attendees are encouraged to ask questions and use the demo to see how simple it really is. Learn how we will save you time! Time = money!! We will learn about why it's important to keep proper records (as mandated by the College) and have those records available at the click of a mouse. We will keep your office up to standards and ensure your staff are accountable for the cycles and all the proper records.

About the Speakers: Lorraine has a business background and Frank was a dental equipment technician for 25 years. Back in 2017, **Frank** saw a need to eliminate the noisy printers on Sterilizers. With Frank's background and Research and Development Skills, we created the first SteriLogger™ from the basement of our home. We grew and relocated the office and continued to grow yearly. From the invention of the SteriLogger™, we listened to Dental Staff members about still having to record data in a binder, so Frank went to work, once again, and created the SteriScan™ system. A complete integrated, hard wired, touch screen device that hangs in the SteriBay from under a cabinet. Simple to use, Compact as the touch screen is only 3" x 5" and Compliant with all governing bodies. Our systems are all completely Canadian made. Each system is made by hand in our facility, we don't ship them out to be built and they are manufactured to meet the application of each individual office's needs. Alpha Micro Tech Inc / Frank Pedersen, have been awarded 2 Government of Canada Grants for the Research and Development that has gone into the technology of the SteriLogger™ (SteriData™) and the SteriScan™ system.

Dentsply Sirona: The Reality of Edentulous Scanning for Implant Level Attachments

Jonathan Verroche DD

1.5 CE Credits

Overview: A summary of myths and realities when it comes edentulous scanning for implant level attachments. The audience will learn the practical applications and what is possible when it comes to primescan, atlantis and a fully digital workflow.

About the Speaker: Jonathan Verroche is a native of Niagara, raised in the beautiful town of Fonthill. His diversity and involvement in the practice has been an asset in growing the Verroche Denture Clinic for the past fifteen years. He graduated from George Brown College with honours and is an active member of the Denturist Association of Ontario and Canada. Jonathan believes strongly in continuing education and enjoys staying current with the latest technology and protocols which allows him to practice a wide variety of procedures, specializing in Full Arch rehabilitation and Digital workflows.

8:00 am to 9:30 am
Spadina Boardroom

Central Dental: Digital Denture Workflow

Lisa Coffin, DD

1.5 CE Credits

Overview: Digital Denture Workflow incorporating Exocad stand alone Denture design module, you will also learn how to capture data using desktop scanner and output files to 3D printers and milling machines. Lecture will cover how to use Shining 3D Autoscan ExPro desktop scanner, navigate software design in Exocad DB Denture module, export finished design to print in Ackuretta Sol 3D printer and mill in vhf R5 milling machine.

About the Speaker: Lisa Coffin has been practicing the art of Denturism since graduating from NAIT in 2010. She has owned and operated a denture clinic as well as associating in several provinces across Canada. Her focus for the past 4 years has been learning the different Digital Denture workflows and the impact they will have on the advancement of removable prosthetics. Lisa strives for knowledge and is passionate to learn and share this information with other like-minded dental professionals.

10:00 am to 11:30 am
Kelsey &
Saskatchewan

Straumann: Digital Implant Planning and Surgical Guide Fabrication

Kale Wudrich, DMD, Msc (Perio), FRCD(C)

1.5 CE Credits

Overview: This course will discuss the advantages of digital treatment planning for surgical implantology, and the benefits it can provide for temporary and final restoration fabrication. Digital tools can expedite the treatment planning process and improve communication between the restorative dentist, surgeon, lab, and patient. With a restoratively driven plan to guide implant placement, expectations are mediated before treatment begins, and highly esthetic and predictable restorations can be achieved.

Objectives:

- To understand the available types of implant surgical guides.
- Know the benefits and limitations of guided implant surgery.
- Understand an overview of the digital planning process for a single-unit implant guide.
- Become familiar with the process of digital planning in Codiagnostix, including data acquisition and merging files.
- Know the basic workflow for taking digital files to an analog state, including in-office 3D printing options. Allow immediate implementation of bone grafting techniques

About the Speaker: Kale Wudrich graduated from the University of Saskatchewan, completing his Doctor of Dental Medicine degree in 2015, and was awarded the gold medal for dentistry as the top graduating student. He completed a General Practice Residency program at the Royal University Hospital in Saskatoon, before moving to Halifax to complete a Masters in Periodontics at Dalhousie University. He became a Fellow of the Royal College of Dentists of Canada in the same year, and has worked as a periodontist in Quispamsis, New Brunswick. Kale recently opened 'Rumley Periodontics' in Saskatoon, specializing in soft tissue surgery, dental implants, and management of periodontal disease, and he is excited to be practicing back in his hometown of Saskatoon.

10:00 am to 11:30 am
Spadina Boardroom

Desktop Health: TBD

Bob Piercy, Business Success Manager

1.5 CE Credits

Overview: TBD

About the Speaker: Bob was born and raised in Saskatchewan. He has spent over 10 years working in the dental industry with Henry Schein. In 2020, in response to the Covid-19 pandemic, Bob started a podcast, Co-Travel Podcast with Bob Piercy, where he interviews professionals who work in and around the dental industry. It was through this podcast where Bob met Kevin Dillon of Desktop Health and a new career opportunity was uncovered. Believing that 3D printing and the Additive Manufacturing industry are the next evolution in personal healthcare Bob joined the Desktop Health team in November of 2021. "I believe that Desktop Health printers and materials will improve the scope and level of care patients will come to expect and appreciate.

LUNCH & Learn – Demo 2 - SteriScan™ System - SIMPLE, Compact and Compliant!

Frank & Lorraine Pedersen

1 CE Credit

Overview: The SteriScan™ system is completely electronic. It is hardwired to the office network and to each sterilizer so it creates efficiencies right from the moment it is installed. It requires very little training and takes up no counter space. There are NO Monthly fees, no user fees, no adapters to purchase, no barcodes to make, no extra piece of equipment is required to run this system.

With all the changes to record keeping from the Sterilizers, learn how the SteriScan™ system will make your record keeping a breeze. We will offer a complete demonstration of the SteriScan™ system over lunch. Attendees are encouraged to ask questions and use the demo to see how simple it really is. Learn how we will save you time! Time = money!! We will learn about why it's important to keep proper records (as mandated by the College) and have those records available at the click of a mouse. We will keep your office up to standards and ensure your staff are accountable for the cycles and all the proper records.

About the Speakers: Lorraine has a business background and Frank was a dental equipment technician for 25 years. Back in 2017, Frank saw a need to eliminate the noisy printers on Sterilizers. With Frank's background and Research and Development Skills, we created the first SteriLogger™ from the basement of our home. We grew and relocated the office and continued to grow yearly. From the invention of the SteriLogger™, we listened to Dental Staff members about still having to record data in a binder, so Frank went to work, once again, and created the SteriScan™ system. A complete integrated, hard wired, touch screen device that hangs in the SteriBay from under a cabinet.

Simple to use, Compact as the touch screen is only 3" x 5" and Compliant with all governing bodies. Our systems are all completely Canadian made. Each system is made by hand in our facility, we don't ship them out to be built and they are manufactured to meet the application of each individual office's needs. Alpha Micro Tech Inc / Frank Pedersen, have been awarded 2 Government of Canada Grants for the Research and Development that has gone into the technology of the SteriLogger™ (SteriData™) and the SteriScan™ system.

Maxim Software Systems: Electronic Patient Records - Know Your 3 R's: Responsibilities, Risks, and (Disaster) Recovery

Alex Zlatin

1.5 CE Credits

Overview: Ransomware is on the rampage again and you need to know how to protect your practice and patient information. In this course, we will review:

Responsibilities:

- What does it mean to be a Custodian?
- What does it mean to be a Privacy Officer?
- Understanding Privacy Regulations.
- What should you be doing, practically speaking?

Risks:

- Hardware/Software/Network failures.
- Malicious employees.
- Ransomware and other malicious electronic attacks.
- Natural disasters.
- Data Integrity – what does this mean?

(Disaster) Recovery:

- Backup – Do you really know if it's done properly?
- Timelines for restore.
- Who is responsible, in case of a disaster?
- Notification – governing body, Privacy Commissioner, patients.
- Insurance – Cyber Insurance, CDSPI, Employee Dishonesty, and Ransomware coverage.

About the Speaker: As the CEO of dental practice management software company [Maxim Software Systems](#), Alex Zlatin helps struggling dental professionals take control of their practices and reach the next level of success with responsible leadership strategies. Leveraging over 13 years of management and consulting experience, he empowers organizations to become more productive and profitable based on the belief that successful businesses establish a genuine connection with employees, stakeholders, customers, and vendors.

His passion for strategic management and business leadership began with earning a B.Sc. in Technology Management at HIT in Israel, after which he attended Edinburgh Business School to earn his MBA. Upon graduating from Heriot-Watt University in 2012, Alex immigrated with his wife Karina to Winnipeg, MB, Canada, where he first joined Maxim Software Systems as the Director of Operations. After working with the company for several years in different capacities, he rose to his current position of CEO.

Alex volunteers his time and expertise to various professional organizations, such as serving on the Advisory Board for [AMBAC](#) (Association of MBAs in Canada), as a business mentor to young entrepreneurs for [Futurepreneur Canada](#), and by launching his own organization, [Dental Office Managers Association of Canada](#).

Dentsply Sirona: What Primescan Can Do For You

Jonathan Verroche DD and Michelle Glover

1.5 CE Credits

Overview: Digital dentistry has evolved at a rapid pace, constantly improving processes to make clinicians more efficient. Looking at your current processes, does your clinic have room to grow in the digital space of patient record taking? Are you able to have real time conversations with your patients? Join Dentsply Sirona as Michelle Glover-DaCosta and dentist, Jonathan Verroche, discuss what the integrated Primescan intra oral scanning can do for denture clinics. Attendees will hear best practices for utilizing Primescan for both fixed and removable cases, as well as learn how to elevate patient experience all while gaining better end results.

At the completion of this course, participants will be able to:

- Identify what Primescan intra oral scans can offer to denture clinics when completing cases for their patients
- Identify what digital workflows Denturists can look forward to with utilizing Primescan in their clinics
- See the benefits of elevating patient experience with intra-oral scans vs. traditional methods of record taking.
- Identify the benefits of utilizing an integrated CAD/CAM solution

About the Speakers:

Jonathan Verroche is a native of Niagara, raised in the beautiful town of Fonthill. His diversity and involvement in the practice has been an asset in growing the Verroche Denture Clinic for the past fifteen years. He graduated from George Brown College with honours and is an active member of the Denturist Association of Ontario and Canada. Jonathan believes strongly in continuing education and enjoys staying current with the latest technology and protocols which allows him to practice a wide variety of procedures, specializing in Full Arch rehabilitation and Digital workflows.

Michelle Glover-DaCosta graduated with honours from George Brown College as a Level II Dental Assistant. She worked as lead CEREC CDA in private practice for five years where she developed her skills in the world of digital dentistry. Michelle became very passionate and well versed in CAD/CAM and the benefits it provides to the dental industry through advanced training with CEREC Doctors. This began her drive to educate and inspire others to understand the benefits of CAD/CAM both from a dental practice and laboratory workflow. In 2016 Michelle join the dental sales industry by accepting a CEREC Representative position with Patterson Dental. It was through her passion for digital dentistry that she accepted the Lab Digital Solution Specialist role with the industries leader in CAD/CAM, Dentsply Sirona.

Dr. Marketing: Increase Your Revenue With High Quality Patients Using Marketing Strategies

Brandon Bosch

1.5 CE Credits

Overview: Dr. Marketing is here to make sense of the complex world of denture marketing. Most clinics we meet are unaware of all the interesting ways to generate patient leads, how a lead can be tracked, or how much a marketing budget should be and what it should be spent on. Our presentation will cover common marketing mistakes, rules and regulations set out by the association, setting a proper marketing budget, and more. We are also going to share strategies of what some of our top denture clinics are doing across the country. Our goal is to ensure our clients' clinics are effectively marketed based on their growth goals and budget.

About the Speaker: Brandon has been working with dental clinics for over 10 years. After leaving Niagara College, Brandon knew that a career in marketing was what he wanted to do, however, just like anyone who leaves school, he wasn't entirely sure where to start. After working in advertising for Rogers Communications, Brandon knew he wanted to be out on his own. Brandon launched, what would later become Dr. Marketing, in March 2014, and a specialty in dental clinics.

To date, Brandon has overseen the production of websites and marketing campaigns for countless clinics across Canada, the USA, and Central America, and continues to grow Dr. Marketing into Europe and around the world. Brandon enjoys time with his beautiful wife and 2 young boys. He enjoys going to the gym, tumbling, rock climbing, baseball, and you could catch him at almost any professional sports game, auto-show, or on the beach.

4:00 pm to 5:00 pm
Salon Batoche

Closing Cocktail Hour

Join us for a drink, our conference course summation, post notes and to give thanks to our sponsors!

Enjoy the scan.

Dentsply Sirona Primescan
