## Precision Body & Paint Completes Subaru Certification Program

Precision Body & Paint of Gresham (formerly Jerry's Custom Paint) is proud to announce that it has successfully completed the newly created Collision Repair Certification process for Subaru of America, Inc., to become one of the very first Subaru-certified facilities in the nation.

As a Subaru-certified collision repair facility, we have completed the required training and purchased the equipment necessary to restore your Subaru vehicle to its original factory specifications after a collision. Subaru training ensures our ability to accurately recalibrate the electronic safety components of your vehicle, such as Subaru EyeSight® Driver Assist Technology, after a collision. In addition, we use only Genuine Subaru parts per Subaru guidelines. Our adherence to Subaru's repair guidelines ensures that your Subaru is repaired to like-new condition after a collision, thus maintaining the protective capabilities that kept you safe in the first place.

### About Precision Body & Paint

Precision Body & Paint is an independently-owned, Oregon-grown company founded in Portland in 1975. Precision has earned over 30 manufacturer certifications, more than any other independent collision repair facility in the Northwest. Precision is located in Gresham, Beaverton, Bend, and online at [www.PrecisionFirst.com](http://www.PrecisionFirst.com).
