Continued EASA Certification Post 29th March 2019

Update November 2018

In the ongoing process of preparing for the UK withdrawal from the Union, the EU institutions have been actively engaged in identifying and putting in place possible preparedness measures in anticipation of that event. In this context EASA have started to process some applications for Third Country approvals from existing UK approval holders.

As of October 2018, Rotable Repairs Ltd. has made the necessary applications for the relevant organisational type, directly to EASA and now been issued a EASA Task No:

| Approval Type | Application Form |
|---|---|
| Maintenance Organisation Approvals – MOA (EASA Form 3 & Form 3MF) | EASA Form 2 Application for foreign Part-145 and Part-M Subpart G Approval |

An update was released on the 22nd November regarding the ‘acceptance of early application’, this details the procedure for application of an EASA foreign repair station approval should the UK withdraw from the Union. The scope of the EASA certificate will mirror that of our existing approval and will be sent to us by email on the 30th March 2019.

IMPORTANT TO NOTE – Negotiations for the United Kingdom’s withdrawal are ongoing at the time of this notification. The final outcome of those negotiations cannot be pre-empted. Applicants must therefore bear in mind that this initiative is being launched in anticipation of a possible so-called ‘no deal’ scenario which would result in the United Kingdom’s effective withdrawal as of midnight (00h00) on 29 March 2019. However, in case of a positive outcome to the negotiations a transition period of 21 months until 31 December 2020 will be opened, during which everything will remain as it is today, and during which current approvals would remain valid until that date or their expiry date whichever comes first.

By pre-processing Rotable Repairs Ltd. application as a member of a Third Country, the continuation of certification privileges without disruption is sought. Rotable Repairs Ltd. remains committed to supporting all customers, worldwide. This announcements from EASA now provides an official, straightforward framework to do so. The Quality Assurance Group are managing each application closely. Should you wish to discuss any details further, please get in touch with our team.

Kind Regards,

Bryan Croft
