

**Thirty years in the making, we are now thrilled to announce that our book, *Through the Eyes of a Child – The Ultimate Guide to Parenting Your Inner Child* is now available!**

Our friend and associate, psychotherapist and coach, Katharine Knapp wrote in the forward of our book, ***Through the Eyes of a Child – The Ultimate Guide to Parenting Your Inner Child***. “Dive in, take the leap, and do the work! Show up! Be accountable to yourself. Take the risk to be vulnerable and see if your “authentic self” has the courage to find, greet, nurture, and connect with your inner child. This may be the most sacred act you ever choose to do. Are you willing to show up? Are you willing to be kind? Are you willing to take action? Do you want to live an integrated life? If so, then create a sacred space, close your eyes, and welcome your inner child to the playroom of your heart.”

The Age of Aquarius offers us cosmic maturity as we experience enlightenment through a deep awareness of our most precious gift from God - our Soul. In this period, more and more of us will recognize the power and goodness of our soul and its wisdom to 'create' our lives perfectly. Because Aquarius embodies the holistic model (e.g., integration of the mind, body, and soul), conscious co-creation begins with a commitment from us to pursue our soul's mission.) Aquarius also honors the uniqueness of the human personality and rejoices in the spiritual connection it has with all humankind. As humanity enters this Age, a universal, spiritually driven pressure urges us individually to recommit ourselves to attainable goals of freedom, brotherhood and tolerance. The Aquarian environment encourages kindred spirits to converge and promote social activism across our planet. In our view, being a cosmic, Aquarian adult means being complete and integrated as a whole and responsible good mother/father to the inner child that lives in our unconscious mind.
