Q&A Interview

With Dee Logan

Project Associate

Program for Clubhouse Research

Implementation Science and Practice Advances Research Center (iSPARC)

1. What is your title and role in the department? How long have you been here?

Title: Project Associate in the Implementation Science and Practice Advances Research Center (iSPARC). I am part of iSPARC's Communication's Team that manages the dissemination of iSPARC's research findings to our different audiences. I oversee the development and writing of our written products and lead our webinar team. I also assist Ms. Colleen McKay, MA., C.A.G.S. with the annual survey to all the clubhouses that are members of Clubhouse International. I am part of the research team led by Nancy Byatt, DO, MS, MBA, FACLP that is a supplement to her Centers for Disease Control and Prevention funded PProgram In Support of Moms (PRISM) study. In the supplement the team is developing and beta testing a screening approach and decision support tool to be used by OBs to screen, access and treat perinatal women with serious mental health conditions.

I have been at UMMS since 2003 and been part of iSPARC for the past 5 years.

2. What are the favorite aspects of your job?

I enjoy working and collaborating with the different staff and faculty at iSPARC and the Transitions ACR. My position offers me the unique opportunity to know what almost everyone is working on and can share that information with our different audiences. I like that I am learning new things every day.

3. What do you like to do in your free time/days off?

I enjoy relaxing and spending time with my husband, family and 3 cats. I love going with my husband to eat at different restaurants. I also like to read and watch cat videos.
