

MANUFACTURING DAYS TOURS

OCTOBER 1, 2019 - OCTOBER 11, 2019

The Manufacturing Days Tours are a series of one-day events held in conjunction with National Manufacturing Day. As part of YCAL's mission to connect educators and employers to engage students in career education and development, we partner with various manufacturers to set up high school group tours throughout the week leading up to National Manufacturing Day. This program exists to help foster the connection between industry and education, to realign many common misconceptions of the industry, and to promote the many career opportunities in manufacturing while celebrating the significant contributions York County makes on a global level.

Participating manufacturers will welcome a group from an assigned high school and host them for a tour. Hosts are encouraged to provide a history of their organization, provide a tour, host a panel, have various departments and jobs represented, provide hands on activities where available and appropriate, and any other educational activity they choose. This is their time to showcase the great opportunities they provide!

Because of the large amount of willing host sites, YCAL cannot guarantee a tour group for your facility each year. To sign up to host a tour, simply email info@ycal.us or call (717) 505-0044 to be added to the list of participating Manufacturing host sites.

Thank you to all manufacturers that hosted students in 2018!

- Coupling Corporation of America
- Crescent Industries Inc
- ecore
- Graham Architectural Products
- Harley-Davidson York Vehicle Operations
- Herculite Products
- MKT Metal Manufacturing
- New Concept Technology
- Pennex Aluminum Company
