

Dear Friends,

This brochure is a limited attempt to share the faces and setting of the wonderful patients we were privileged to serve. Our team was aided by volunteers from Esquipulas, a nurse from the monastery, local health promoters from the villages, and your generous support. Together we helped make a contribution to the healing of our broken world.

Sr. Kathy

GLOBAL HEALTH VOLUNTEERS

Mission to Guatemala 2023

This year Global Health Volunteers once again traveled to Esquipulas to visit scattered villages with limited access to healthcare.

We were hosted by the Benedictine monks who graciously offered us hospitality and daily support.

Once we arrive at the village, we quickly set up our clinic and begin registering and attending to those who have been waiting, not just today—but for weeks and months for medical care.

Each person we meet has a story to be told.
