

Grading Opportunities

As we continue to navigate these uncharted waters, we would be remiss if we did not ensure that our students have access to every equitable grading opportunity. Regardless of the type of learning environment provided to our students, teachers should continue to follow the grading protocols released during the [19-20 school year](#).

This document provides information about the various grading opportunities that teachers may use in to collect student work, provide feedback, and record grades. There are several district-provided platforms and resources which teachers can use. To learn more about these resources, along with other useful tools, click on the link below each content area.

For questions about information contained in this document, please contact any member of the Curriculum & Instruction Department. <http://www.scsk12.org/ci/staff>

English Language Arts

Mathematics

The mathematics digital resources (Remote Learning Plan link below) provide opportunities for Tier 1 instruction, practice, and assessment. While some resources are graded online, others can be downloaded and used via Microsoft Teams.
