

Mobile Mammography COVID-19 Precautions:

Methodist has a team of experts carefully monitoring the COVID-19 outbreak. Out of an abundance of caution for our patients, families and staff, we have implemented new screening and safety protocols. Methodist's top priority is providing the best healthcare for patients in the safest environment for employees, providers, patients and the community.

Safety protocols include:

1. Patients and Methodist associates receive a health screening prior to entering any Methodist facility, including the Mobile Mammography Unit. The health screening includes temperature scan and the most recent screening questions established by the CDC.
2. Each patient will receive a mask. All Methodist providers and staff wear masks.
3. We have reduced the amount of appointments each day to allow for comprehensive cleaning of the exam room and equipment, dressing room, and waiting room in between patients. Appointments are set 30 minutes apart.
4. The number of patients and associates on the Mobile Unit is limited to allow for social distancing. It is important to arrive on time for appointments, as we are unable to accommodate additional patients waiting inside.
5. Hand sanitizer is provided in all public areas.
