

i-Ready: Supporting K-2 Students

Touchscreens

- If you are hearing of issues with i-Ready drag and drop functionality, you can share this language:
- Let the educator/parent know that we know some K-2 touchscreen-only devices are experiencing issues when using the drag and drop feature. Field testing has been completed, and while we know that some devices may have a delay or have hesitation, most students are able to complete with practice and patience. If issues persist:
- Allow the student to complete the diagnostic/lesson on another device or computer if available.
- Connect a mouse to the device and allow student to use the mouse to utilize the drag and drop feature. Or, a stylus may work as well.
- If the student is working on lessons, have their teacher skip them past the lesson with *attached instructions*
- If none of the above options are available please send RTI2@scsk12.org an email with the following information so that we can trouble shoot:
 - Student PowerSchool Number
 - Subject of Diagnostic or Lesson (Math or Reading)

Ensuring Strong Personalized Instruction

- Best practice is to check Personalized Instruction Reports in i-Ready weekly. Ensure students paths look passing lessons (70% average pass rates or greater) and that minutes are on track (min of 30 per subject, per week). As K-2 students may inadvertently receive more assistance from family on the Diagnostic at home, ensure instructional paths look to be in an appropriate place. To adjust the path, [follow instructions here](#).

PD Office Hours

- **Monday afternoons from 4:30-6:30** with Lorene Essex - www.gotomeet.me/LoreneEssex
- **Friday mornings from 7:00-9:00** with Elaine Price - www.gotomeet.me/ElainePrice
