

SCS Professional Learning and Support: Technology Training Sessions

May 2021

Types of Professional Learning sessions available to teachers this October:

- **Teams.** These sessions are to ground teachers in the technical knowledge and skills they need to use Teams to facilitate digital learning. As we shift towards a more collaborative approach all sessions will also be making explicit connections to the instructional practices and moves teachers need to make (**3 hours**)
- **Micro.** These smaller “bite-sized” sessions are grounded in very specific topics that are high interest. These sessions will be worth 1 hour and are intended to provide actionable strategy/skills teachers can put into immediate practice with their students in support of digital learning (**1 hour**)
- **Supplemental.** These sessions will make explicit connections to the technical knowledge teachers need while providing them with the instructional practices and moves they need to make (**3 hours**)

The Teams courses will be offered in Canvas. The micro and supplemental courses will be offered in Canvas. Teachers can self-enroll in PLZ using the cadre or course numbers provided below.

Teams Courses

Course Title	Canvas Number	Live Session Number	Live Session Dates
Microsoft Teams for School Collaboration	CADRE960 *Available through May 28, 2021	<i>Not offered</i>	<i>Not offered</i>
