

# POWER ON

Properly functioning devices will be a key factor in ensuring our students are successful in the TNReady assessment. It's time to **POWER ON**.

**Why you should power on your devices regularly:**

- Ensure your device receives updates and software pushes. Mac/Apple computers are not included at this time.
- Ensure there are no technical issues with your device
- Avoid last minute software updates as installation times vary and could affect students' testing time
- Your laptop device is automatically disconnected from the District's network when it isn't powered on after **90 days**

**RECOMMENDATION:**

**Leave devices powered on for a half-day at least twice a month on the 1st and 3rd Friday of every month through May 2019**

If you have any questions or need updates to your devices, contact **(901) 416-2700**.
