NEW WiFi COMNG TO SCS

On **October 14,** the District's current WiFi network will go away for good. Our IT team has upgraded the WiFi network to help keep the District's info more secure. Plus, they've made it a whole lot easier to log in! **Make sure you log into the new "SCS_WLAN" network NOW so you don't lose access.** Just use your Active Directory ID, which is the same username and password as your email. **It's simple to log in:**

1. Select "SCS_WLAN" from the available networks in your device's WiFi settings.

2. Log in with your Active Directory ID.

3. The first time you log in on a device, you will be asked to trust the certificate. Once you do, you won't be asked again.

4. *If you're a Mac user, there is one extra step. After completing the three steps above, you will see another pop-up window asking for a username and password. For this, you will enter the password for your actual device, not your email password. Once you do, you won't see the popup again.*
