CHP is thrilled to provide the best possible women's health care through the expertise of our team.

Recently, CHP and Fairview Hospital announced plans to re-establish certified nurse-midwifery care in South County. We are pleased to welcome two new certified nurse-midwives, Lisa Fraine and Susan Greenberg-Yarmush, to our Great Barrington practice, along with a new obstetrician-gynecologist, Dr. Andrew Beckwith. These providers now complement the team that includes Dr. Antoine El Khoury, Nurse Practitioner Molly Rivest, and our excellent nursing and support staff. We could not ask for more highly qualified professionals to care for the women of our Southern Berkshire region.

With the addition of these new providers, CHP Barrington OB-GYN offers more choices and additional flexibility as we meet women's health needs throughout the lifespan: from prenatal and maternity care through menopause, along with routine and complex gynecological care.
