Revenue Cycle Management Solutions

for Complex Claims

CollectRx™

Maximize Reimbursements with Collect Rx

EVERY CLAIM EVERY TIME

Getting paid correctly and on time by payors is becoming more complex. As it does, the burden is on providers to adapt to a never-ending stream of new guidelines, financial rules, and reimbursement tactics practiced by the payors as they work to reduce payments and force providers and facilities to accept increasingly reduced rates.

And the cost to recover that revenue is skyrocketing. Collect Rx's innovative technology, processes, workflow, data-driven approach, and unique payor-side knowledge put you in the driver's seat, ensuring that for every claim, you receive the highest reimbursement rates, every time. We help keep your operating margins healthy with data, insights, and optimization of every claim in your revenue cycle, every time.

"All the payments you're entitled to, for every claim."

CRXIS™ Business Intelligence Engine

CRXIS is Collect Rx's proprietary database and software solution that provides us with the engine to maximize out-of-network reimbursements. It delivers information regarding insurance policies, provides claim-level comparable data, and tracks the trends and tendencies of the insurance companies and their vendors.

A sophisticated tool that streamlines A/R follow-up, delivering transparency, accountability, and most importantly, results! CRXIS automatically scans payer websites, 835 data, transaction data, and every account in your A/R to identify, assign, and prioritize at-risk accounts by the use of bots. It also reconciles every account, from assignment to zero balance, to make sure nothing slips through the cracks.

For the fastest, most accurate coding, we utilize coding technology that optimizes workflows and audits coding so providers experience lower costs with reductions in turnaround times, denials, and A/R. With Collect Rx, we are consistently monitoring and improving coding quality.
