

**ProMoss™ “Nature’s Way”**  
**Water Treatment Seminar at Nighshift Brewery**  
**Wednesday, May 8<sup>th</sup> from 12N – 3PM**  
**87 Santilli Highway – Everett, MA**

Please join us for a presentation about “Nature’s Way” water treatment using ProMoss™ to effectively control calcite scale, organic contamination and corrosion. Applications include hot water and chilled water loops, cooling tower condenser loops, pools, spas, fountains and process applications. ProMoss™ harnesses the water treating power of renewable, environmentally friendly Sphagnum moss to provide multiple system benefits and operational savings as outlined below.

Universities, Fortune 500 Companies, schools, hospitals, multifamily, industrial, institutional and commercial building owners across the country and locally here in New England are switching to a greener more natural way to treat the water in their HVAC and process systems to help meet

their corporate goals of reducing energy, saving water and reducing or eliminating hazardous chemicals and their potentially costly application and control.

Dr. David Knighton, M.D., Chairman/CEO/President of Creative Water Solutions, will present a series of detailed case studies demonstrating the use of ProMoss™ products and how they provide effective water treatment while greatly minimizing or eliminating hazardous chemical use.

**Customers include:** University of Maryland, Zambarano Hospital (RI), Rochester Institute of Technology, YMCAs, Canal Place Condominiums (Lowell), Corning Glass facilities, Salvation Army Kroc Centers, Harris Corporation, Finger Lakes Community College, Hazlitt Winery, Terphane, Inc. and many more.

**Event Agenda & Schedule:**

**12N:**

**Doors open, light lunch is served**

**12:30 – 2PM:**

**Presentation, Q&A**

**2 – 3PM:**

**Networking with colleagues while enjoying a pint or soft drink**

*Event Discussion Topics on following page*

## **Creative Water Solutions - ProMoss™ System Applications:**

- Cooling Towers
- Chillers
- Evaporative Condensers
- Chiller water loops
- Boilers - Hot water loops
- NSF 61 certified
- Replace or reduce water softener use
- Air Wash Systems
- Aquariums
- Decorative Fountains – eliminates the chlorine odors and eliminate calcite scale
- Rain Water Cisterns

### **Benefits:**

- 1) Eliminate calcite scale - saves energy
- 2) Organic contamination control – saves energy
- 3) Meets rigid NY State Legionella requirements when combined with ozone disinfection system
- 4) Control corrosion - extends equipment life
- 5) Save water
- 6) Eliminate hazardous chemicals
- 7) Improve work environment for staff and contractors
- 8) Reduce or eliminate costly chemicals, related EPA reporting, training, spills, etc.

### **Wastewater Applications**

- Significantly reduce metals through cation reaction with ProMoss™ in clarifiers
- Reduce polymer use
- Reduce phosphorous
- Clarify water and reduce filtration backwash – saves water

### **Swimming Pools & Spas**

- Significantly reduce chlorine to State minimum
- Eliminate chlorine odors - chloramine & tri-chloramines
- Eliminate calcite scale – saves energy
- Reduces organic contamination – saves energy
- Significantly reduces backwash frequency - saves water & \$
- Reduce chemicals – saves \$
- Lower required maintenance
- Works with chlorine, bromine, ozone and salt systems
- NSF 50 certified

### **Ponds – Water clarification**

**To RSVP please visit <https://PromossNightshift.eventbrite.com>**

Feel free to bring a guest or share with someone in the industry who might like to attend.  
There is parking available at & nearby the brewery. Questions? Please email Dan Cook:
