

Pat Emerson - Candidate statement & bio

I am putting my name forward for the Primitive Weapons Director currently up for election.

The past two years I have been the Archery Director and have made many changes and improvements to the archery range. I look forward to making similar improvements to the black powder trail to bring it back to what it once was and even better.

Should I be elected my first order of business would be to assess the black powder trail to determine what is required to get it open and compliant to the CFO recommendations.

I also hope to work towards extending the 3D archery trail adding new targets and lanes.

These plans will be a very large undertaking and it will take many volunteers. My plan would be to reach out to our members to form a committee to assist in planning the improvements and organizing work parties to get it done.

I will also be looking to assembling a committee to assist with programs and events in both black powder and archery towards an overall primitive weapons program.

It is my goal as Primitive Weapons Director to ensure that both black powder and archery thrive as a part of what the SPFGA has to offer.
