

Sanibel Guidance for Assisting Residents With LCEC Power Activation

A. Buildings where electrical equipment was flooded or damaged by Hurricane Ian, or that have been notified by LCEC that a city inspection is required to obtain power, are required to follow the below steps for the city to notify LCEC that power may be restored:

- a. All Commercial, Multi-Family, and Single-Family homes with an electrical service greater than 600 amps:
 - Florida Building Code requires a licensed Florida engineer to provide an inspection and approval of the existing electrical equipment.
 - If undamaged, please provide the approved for power engineers report to the city at the following email addresses.
 - If damaged a licensed electrical contractor must make the required repairs and then have their engineer reinspect and provide the approved for power engineers report to the city at the following email addresses.
 - Once the approved for power report is received, the city will notify LCEC that the power may be restored.
