| Title              | <b>ARTEMIS: Advancing Addiction Research and Treatment through Engagement with Rural Marylanders Impacted by PolySubstance Use</b>                                                                                                        |
| Major Goals        | This project proposes to develop a patient engagement resource center and national model for consultation to engage patients and other stakeholders in the research process, with a focus on addressing polysubstance use in rural areas. |
