

SHIP & SHORE
ENVIRONMENTAL, INC.
Clean Air Solutions for Industry

To Our Ship & Shore Family, Vendors, and Community:

On March 19, 2020, Los Angeles County officials issued the Safer At Home order in an effort to control the ongoing Coronavirus (COVID-19) emergency. This mandated that all non-essential businesses are to cease operations.

As a vendor, supplier, and ancillary service to the plastics, food and beverage, food packaging, sanitary packaging, and pharmaceutical companies, **Ship & Shore Environmental is deemed as an "Essential Business."** Without our equipment or proper maintenance of our products at our customers' plants, these necessary businesses are not able to comply with air quality rules and regulations and therefore will not be able to operate. We are as essential to them as they are to all consumers.

Please note that **Ship & Shore Environmental is still in full operation** and are available to respond to any needs or support required. Some of our employees are currently working from home while those that are in the office are maintaining reasonable social distancing and sanitary practices.

Ship & Shore Environmental has several global representatives, service technicians, technical sales team members, and partners all around the world to assist our customers wherever they may be.

We will continue to operate so long as our employees remain healthy and our customers in full production. We will be looking out for each other and working as one Ship & Shore family.

On behalf of all of us at Ship & Shore, I wish you, your team, and all of your families the best health during this time. Please do not hesitate to reach out to us for any concerns, questions, or support needed.

Take Care,

Anoosheh Oskouian
President & CEO
