

EXPAND YOUR REACH.

Because real cleaning
doesn't stop at the floor.

Dust and debris do not stop at floor level. Vents, ductwork, ledges, light fixtures, and other elevated surfaces can collect buildup that impacts the appearance and cleanliness of a facility. GoHigh Dusting Kits extend the capability of ProTeam corded backpack vacuums so teams can address above-the-floor cleaning from the ground. Lightweight poles and specialized tools help crews clean high areas more consistently, reduce the need for ladders or lifts while improving indoor air quality (IAQ).

Two ways to EXPAND YOUR REACH.

Whether your facility needs routine reach for everyday high-dusting tasks or maximum extension for larger open areas, GoHigh offers two kit options designed to match the way your team cleans. Both kits connect with ProTeam corded backpack vacuums to extend cleaning capability above the floor and help teams address more surfaces with less disruption.
