

BRINGING EMPLOYEES BACK SAFELY FOR BLUMINE HEALTH EMPLOYERS

BluMine Health is accessing its exclusive partnership alliance with Baptist Health and sharing Baptist's own playbook to support a safe return to work for its exclusive employer members.

Available to BluMine Health employer partners, the following direct-to-employer COVID-19 screening tools are convenient and easy to use. And, they can be customized to fit each employers' specific needs.

- **A BAPTIST HEALTH COVID-19 TESTING SOLUTION**, both for employees with symptoms and those without symptoms who may have been in contact with a co-worker who tested positive. Baptist Health can complete testing onsite or at Baptist Health Urgent Care locations, found at [BaptistHealthClinics.com](https://www.baptisthealthclinics.com).
- **A BAPTIST HEALTH WEB-BASED SCREENING APPLICATION** we are using to protect patients and staff as employees return to work in our own medical facilities and administrative offices. Employees simply scan a QR code or visit a website to answer COVID-19 symptom-related health questions. Once the form is submitted, an employee either gets the green light to enter the building, or is referred for testing. *Offered by Baptist Health at no charge to our BluMine employer partners.*
- **BAPTIST HEALTH MYCHART CARE COMPANION**, a home monitoring and case management platform conducted through Baptist Health's patient electronic health record in conjunction with Baptist Health Virtual Care providers. Connecting patients with medical resources ensures they receive timely care and can help patients recover faster. Care coordination also supports employers by facilitating a medical informed return-to-work process. Symptomatic patients will receive a pulse oximeter and forehead thermometer for self-monitoring and reporting through MyChart (while supplies last). Care coordinators are alerted if a patient's condition worsens. *Offered by Baptist Health at no charge to our BluMine employer partners.*

For more information about Baptist Health's COVID-19 workplace reopening service, contact: Julie Russell - jnrussell@bluminehealth.com

ABOUT BAPTIST AND BLUMINE HEALTH

Blumine Health accesses Baptist Health's hospital markets and 300 points of care to drive a white glove continuum of concierge medicine for its 20,000+ exclusive direct primary care patients.
