

# Rural Caregiving Telemedicine Program: Staying Connected and Engaged

## July 23, 2020

**6:30PM-8:00PM Eastern / 5:30PM-7:00PM Central**

Join us for an educational session focused on how to support our loved ones from a distance or from within the same home. Discussion will include activities and strategies to stay engaged and connected. Following the presentation we will have a general questions and answer session.

Please bring your questions about dementia, brain health, and care and treatment for your loved ones.

We look forward to an engaging session!

This program is offered through an interactive telemedicine system to connect with persons who are impacted by Alzheimer's disease and related memory disorders, providing education and supportive services across the state of Kentucky.

**This event is FREE and open to the public.  
Registration is required.**

*Register to connect via computer or phone.*

*Note, the connection information is different from the past.*
