Spring 2021 Webinar Presentations Introduction to Deaf-Blindness Series

(MT Office of Public Instruction renewal unit credit available)

Presenter: Dr. Susan M. Bashinski

Dr. Susan M. Bashinski is a Professor of Special Education and is currently serving as the Interim Dean of the Missouri Western State University Graduate School. She has more than 40 years of experience working with learners who experience multiple disabilities, including deaf-blindness and CHARGE syndrome. Throughout her career, Susan's research interests and areas of expertise include early communication, gestural communication, and language development; augmentative communication; and cochlear implants for learners who experience deaf-blindness.

These webinars are brought to you by the Montana State Deaf-Blind Project.

The Montana Deaf-Blind Project is supported by grant #H326T180038 from the U.S. Department of Education, Office of Special Education Programs (OSEP). The statements herein do not necessarily reflect the opinion of the Department.

What Is Deaf-Blindness?

March 24th, 2021 from 1:00 to 2:30 MDT

REGISTER

This webinar will introduce a functional definition of deaf-blindness, along with the key questions to be answered in order to determine if a particular learner experiences deaf-blindness (DB). The presenter will introduce various etiologies of and categorization schemes for DB (i.e., by time of onset, degree, and type), as well as benefits of categorizing deaf-blindness by both time of onset and degree. Specific examples of each of four major categories of DB will be included. The webinar will conclude with an explanation of the primary ways in which deaf-blindness impacts a learner's interaction with the environment and school performance.

Introduction to Vision Loss and to Hearing Loss

April 7th, 2021 from 1:00 to 2:30 MDT

REGISTER

In this webinar, the presenter will examine vision loss and hearing loss independently. For both visual and auditory sensory systems losses, discussion will include: the major types of loss, how a learner processes information as a result of various individual types of loss, and the potential impact of combination of losses in each sensory system. The webinar will include a general description of the way in which diagnosticians describe each sensory loss. It will conclude with a presentation of some key resources for families and educational teams.

Unique Learning Needs and Building Structure through Routines

April 21st, 2021 from 1:00 to 2:30 MDT

REGISTER

Foundational to this webinar is the fact that learners who experience deaf-blindness (DB) are an incredibly heterogeneous group. The presenter will discuss general characteristics of learners with DB, relevant to learning, within the context of what communication partners should remember and strategies they should utilize when they meet and interact with a learner who experiences DB. The webinar will provide a functional definition of a routine and its essential elements, while focusing on the critical importance of structure for a learner with DB. The presentation will conclude with an examination of the essential skills a learner can gain from meaningfully structured activities / tasks.
