

Play: Is It Just for Fun or Am I Learning?

The Early Years: Building Blocks for a Successful Future Conference

State Personnel Development Grant
(Grant No. H323AO50005)

REACH MS

Realizing Excellence for ALL Children in Mississippi

- Mississippi's State Personnel Development Grant (SPDG)
- Awarded to the Mississippi Department of Education in 2005, refunded in 2010 and 2016.
- Operated by the University of Southern Mississippi's School of Education.
- Two areas of focus:

Universal Design for Learning (UDL)

- K-3 Classrooms

Positive Behavior Interventions and Supports (PBIS)

- Tier I, II, & III in K12 Schools
- Student-specific for students with significant cognitive disabilities (SCD)
- Early Childhood Settings
- Facility-wide in
 - Juvenile Detention Centers
 - Therapeutic Group Homes

REACH MS GOALS (2016-2021)

Goal 1: Increase the academic performance in English/Language Arts of Pre-K – 3 students with disabilities through implementation of Universal Design for Learning.

Goal 2: Support development and expansion of positive learning environments in Mississippi through effective implementation of Positive Behavioral Interventions and Supports within a MTSS Framework.

What is Play?

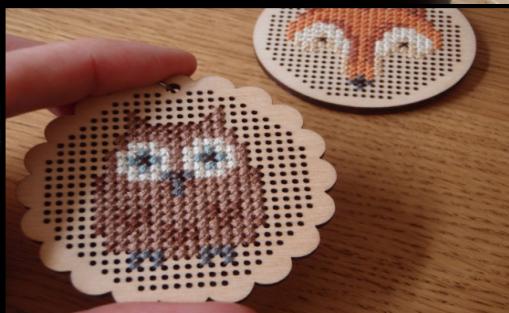

Miriam Webster's definition:
to engage in sport or recreation

What ways would you define play for yourself?

Play for Adults

- Hobbies
- Sports
- Time with friends
- Things that are relaxing

Play for Young Children

- Toys
- Outside
- Time with friends
- Things that are relaxing

Plays on Play

- Play-Doh
- Playground
- Play
- Play It Again Sports

Scientists have recently determined that it takes approximately 400 repetitions to create a new synapse in the brain – unless it is done with PLAY, in which case, it takes between 10-20 repetitions.

- Dr. Karyn Purvis' research

Purposeful Play – Where?

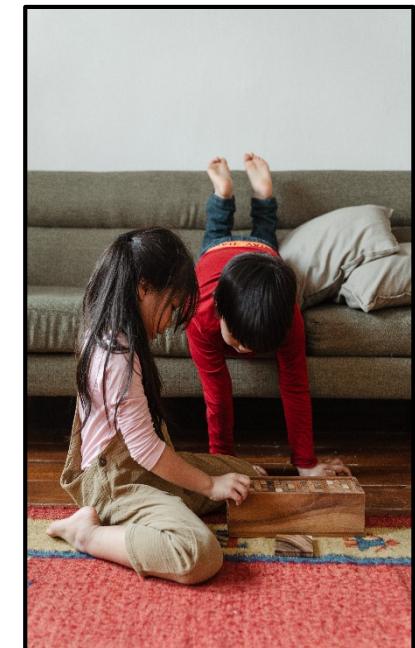

At School/Child Care

- Learning Centers
- Playground
- PE
- Hands-on planned activities

At Home/Community

- Bedroom
- Living room/Playroom
- Outside
- Park
- Anywhere....

Developmental Areas Used in Play

- Communication/language
- Social emotional skills
- Cognitive skills
- Motor skills

Why these?

Play is hands-on with items and typically requires interactions.

Communicating During Play

- Engage in cycles of communication, also called serve and return.
- Use the form of communication the child uses to label items, people, processes, etc. and expand on this communication.
- Pair other forms of communication with words.
- Wait....give the child time to respond.
- “Require” communication or an attempt.

Utilizing Social Emotional Skills

- Practice social skills during interactions of play.
 - Turn taking
 - Sharing
 - Using nice words
 - Helping
- Read/view specific social stories for difficult play situations.
- Practice emotional literacy during play.
 - Identify emotions
 - Relate to others' emotions
 - Self-regulate
- Use visuals to help the child manage feelings and self-regulate.
- Begin to solve problems with visuals.

<https://challengingbehavior.cbc.usf.edu/Implementation/Program/strategies.html>

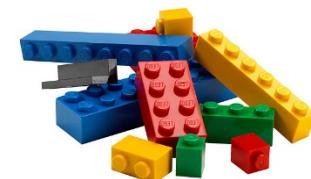

Building Cognition

- Extend the child's play with interactions that take his/her ideas and current play and further them (i.e., scaffolding).
 - Add in a new item.
 - Ask a question.
 - Use different vocabulary.
- Provide opportunities for the child to make choices.
- Encourage the child to finish tasks and activities.
- Encourage the child to play with different children/people, in different settings, and with different materials.

Motor Play

- Outside is a good place for big muscle motor skills.
- Assist children in learning how to use outside equipment on the playground, at home, and/or at the park.
- Use stairs, balls, riding toys, etc. to practice skills.
- Manipulatives are great for small muscle motor skills.
 - Play-Doh
 - Puzzles
 - Toys with pieces that “move” – push, pull, turn, open, shut, slide, stack, connect, roll, etc.
