Frequently asked questions.

How do I know if factoring is right for me?

2000 businesses fail every day due to lack of cash: If you have cash flow problems due to your cash being tied up by unpaid invoices to your customers, then factoring is perfect for you.

How can Mazon give me cash for my unpaid invoices?

Turn invoices into cash: We convert your invoices to cash upfront (80-90% value) in exchange for the original invoice, purchase order, and proof of completion. We then collect the full invoice amount from your customers.

Where does the other 10% - 20% of the invoice go?

When we receive a check or ACH from your customer, this percentage becomes real money and is given back to you on a regular basis as each invoice pays.

How often do I give my invoices to Mazon?

You may present us with a schedule of invoices as often as you would like.

How soon can I get financing?

After the schedule of invoices is processed, funding will be made by check, deposit ACH or wire transfer at your discretion. Funding normally occurs that same day.

How much does Mazon charge for this service?

The rate is based on monthly dollar volume, number of invoices, the length of time it takes invoices to pay, and the credit of your customers. This ranges from 2% to 5% based on monthly factored volume between $5,000 and $2,000,000. Higher monthly billings may be eligible to receive lower rates.
