

# CARIBBEAN COOPERATIVE MRV HUB

Measurement • Reporting • Verification

## Meet Ahyana Bowen

Ahyana is a Grenadian Environmental Scientist that holds a bachelor's degree in Biology from St. George's University in Grenada. She received her master's degree in Environmental Science & Engineering from the UNEP Institute of Environment for Sustainable Development in Shanghai, China. She is also trained in climate finance acquisition proposal writing and project management.

Currently, Ahyana is employed at the MRV Hub, developing tools and other regionally- pooled institutional arrangements that empower English-speaking CARICOM countries to efficiently

establish MRV systems, develop GHG inventories, mitigation assessments, and track NDCs. She is the Vice President of the Caribbean Youth Environment Network (CYEN) Grenada Chapter. Previously, Ahyana worked in the private sector as a science educator, where she inspired young academics to pursue their passions relentlessly and espouse their role as responsible global citizens.

***“Every calling is great when greatly pursued.”***

— **Oliver Wendell Holmes Jr.**

---

Ahyana is a lover of all things nature, art and culture; and a firm believer in life-long learning. Her love for nature and sustainable practices lead her to become involved in community advocacy and challenges her to continuously seek ways of practicing conscious consumption and decreasing waste production in her own life.
