

Meet the MRV Hub Network

Matej Gasperic is a Senior Project Manager at the Greenhouse Gas Management Institute (GHGMI) and the Caribbean Cooperative Measurement, Reporting and Verification Hub (MRV Hub). Matej provides support to the MRV Hub's technical activities and management functions. He supports the development of tools for GHG inventories and MRV systems.

Prior to joining GHGMI, Mr. Gasperic was counselor to the Government of Republic of Slovenia and an independent consultant, providing leadership and expertise in the process of the preparation of the Low Carbon Development Strategies and Air Quality Programmes in the Balkan area. In this role he brought together both climate and air pollution issues and was responsible for setting up an MRV system for GHG/Air pollutants, preparing local and regional carbon pricing schemes, and developing EU directive specific implementation plans. He also provided technical support for preparation of the transposition of the EU climate acquis and its implementing acts such as Monitoring Mechanism Regulation and monitoring, reporting and verification (MRV) under the EU Emission Trading Scheme and the EU Effort Sharing Decision. As a UNFCCC reviewer for GHG inventories of Annex I countries and lead reviewer for National Communications and Biennial Update Reports, he is actively engaged in the UNFCCC annual inventory review process.
