USGBC-LA's 2017 Legacy Project

VEGGIE BUS

a classroom, plant nursery and seed library

Paul Robeson Community Wellness Center
6569 S Vermont Ave Los Angeles, CA 90044

Project Description

Veggie Bus project seeks to re-purpose the out-of-use bus using the following strategies:

- **Site:** Grow edible & native plants.

- **Water:** Collect run-off, store in barrels and use to water plants in the bus plant nursery.

- **Energy:** Install Solar panels & use to power lighting and electrical outlets throughout the bus.

- **Materials:** Re-purpose an old bus for a classroom and nursery & make use of recycled & repurposed materials for shelving and drainage.

- **Resilience:** Provide space for programs to build residents' skills and knowledge.

- **Urban Agriculture:** Propagate edible and native plants, use in the onsite urban farm, and distribute to local residents during trainings. Organize and store seeds saved from the onsite farm as part of the seed library to use next season and to share with community members.
