

# HOOD RIVER-WHITE SALMON BRIDGE REPLACEMENT

October 20th, 2025

RE: Request for Input: Columbia River Navigation and Dimensional Characteristics.

Dear Columbia River User:

The Hood River-White Salmon Bridge Authority (Authority) is advancing the design of the Hood River-White Salmon replacement bridge that will replace the existing bridge over the Columbia River. The Authority has been requested by the US Coast Guard to update information on river use in the vicinity of the bridge. The last survey of river users was in 2019. You have been identified as a user, or a business/organization that serves users, of the Columbia River in this area. We are asking you to complete a river user data survey. Please fill out the vessel data survey at the following link, submitting one form for every vessel in service: <https://forms.gle/SX6JfyAASAwBHbDr9>. **If you would like to submit vessel information to us in a different format, please feel free to contact us at the email below.**

**Please complete the vessel data survey by November 7th, 2025.** Doing so will support development of documentation and permits required for the bridge replacement, by allowing the Authority to accurately identify current and future needs of vessels that use the Columbia River and identify the impact of the bridge on navigation. If you have any questions about the survey or the project, please **email us at [info@hoodriverbridge.org](mailto:info@hoodriverbridge.org)**.

Thank you very much for your help and your prompt response to this request.

Best regards,  
Hood River-White Salmon Bridge Replacement Project Team
