

## Lessons from a MDR TB Survivor: **A World Tuberculosis Day Webinar**

**Monday, March 25, 2019  
12:30-1:30 P.M. Pacific Time**

### **Featuring Khayr Abdi**

Diagnosed with multidrug-resistant tuberculosis (MDR TB), after working in East Africa, Khayr Abdi shares his story with healthcare professionals to lessen the physical and psychological side effects of future patients undergoing TB treatment.

### **Learning Objectives**

- \* Describe two ways of communicating with TB patients that diminishes stigma of the disease to promote successful completion of treatment.
- \* Identify some of the challenges and successes of a TB survivor's experience with healthcare professionals to better inform future patient interactions

TB ECHO® (Extension for Community Healthcare Outcomes) is a virtual learning community of health professionals that meet weekly, by video conference, to get consultation on their TB-related patients and learn about best practice standards of care. Continuing education credits are available for didactic sessions. To learn more about TB ECHO®, or to enroll, visit [www.doh.wa.gov/TBECHO](http://www.doh.wa.gov/TBECHO)

### **REGISTER TODAY**

If you are not enrolled in TB ECHO®, please register for the World TB Day webinar online at: <https://conta.cc/2tqG4p>
